Derivative Highlights.

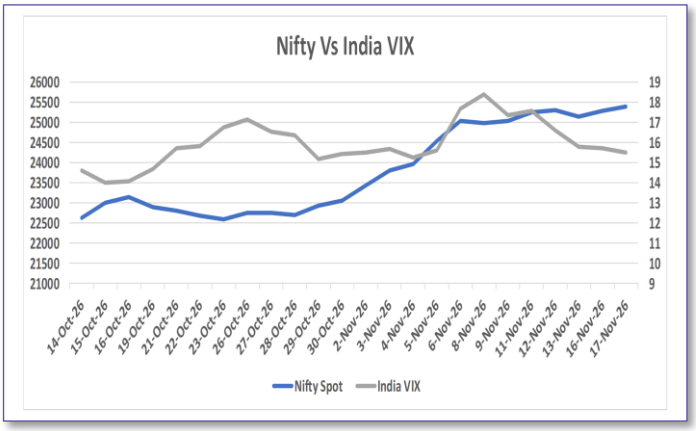

- On Tuesday, Nifty Futures extended their buying momentum for the second consecutive session, closing 0.48% higher. The index futures continued to witness buying interest at elevated levels, indicating that the broader bullish sentiment remains intact. However, profit booking during the latter part of the session erased a significant portion of the intraday gains, with the index futures nearly declining 182 points from its day high. Despite this late-session selling pressure, Nifty continued to sustain above the 25000 mark, indicating consolidation at higher levels and a potential pause following the recent upward move. On the derivatives front, implied volatility declined, indicating easing uncertainty, while the PCR remained in the neutral zone, suggesting the absence of aggressive fresh buying and a relatively balanced positioning among market participants. Overall, the broader structure remains constructive, although profit booking at higher levels and neutral derivatives indicators suggests a moderation in near-term momentum.
- Meanwhile, Bank Nifty Futures continued to extend their upward momentum, with fresh long build-up indicating sustained buying traction and continued bullish participation. The index witnessed a decisive range breakout during the session and scaled fresh all-time highs, highlighting strong buying interest and the continuation of its prevailing bullish trend. On the derivatives front, implied volatility remained elevated, while the Put-Call Ratio continued to trade in the bullish zone, reflecting positive market sentiment and favourable positioning. Overall, Bank Nifty continues to exhibit strong bullish momentum, supported by fresh long build-up, a range breakout and sustained buying interest at record levels.
- For the Weekly series, the 25400 strike has significant call open interest, followed by the 25500 strike. On the put side, 25300 has a substantial open interest, followed by the 25200 strike. Taking the gap down opening into consideration, the 25220-25200 zone is expected to provide strong support to the index followed by the level of 25050. On the upside, the 25480-25500 zone will act as an immediate hurdle.
- In Bank Nifty, the 62500 strike has significant call open interest, followed by the 63000 strike. On the put side, 62000 has a substantial open interest, followed by a 61500. Taking the gap down opening into consideration, the 62000-61900 zone is expected to act as a key near-term support area for the index. As long as Bank Nifty sustains above this band, the broader bullish structure is likely to remain intact, with any short-term consolidation likely to be viewed as a healthy pause within the ongoing uptrend.
